# CLINICAL INFORMATICS RN - PCS

## Position Opportunity

Jacobus is currently seeking qualified associates to fill positions for LENGTH OF CONTRACT with West Coast/East Coast/Mid West/Etc. hospital. This position is available to sub-contractors, full-time employees, OR both sub-contractors and full-time employees.

## About Jacobus

Jacobus Consulting is a leading healthcare IT services firm that partners with providers to improve healthcare outcomes and streamline operations through improved clinical systems, revenue cycle performance optimization, and healthcare information systems. In the face of changing healthcare industry technology, regulatory demands, and financial landscape, we provide a complete suite of solutions.

## About This Position

This position works with healthcare organizations that are implementing or optimizing MEDITECH's PCS (Patient Care System). This position will assist healthcare organizations to first examine their existing processes in MEDITECH, another system or on paper for opportunities to change, add, or eliminate any steps that are no longer adding value. This includes documentation standardization across disciplines and with an eye towards PDOC. This also includes best practice implementation strategies around multidisciplinary care planning. Develop process redesign as a strategic initiative to improve the quality, cost, and safety of patient care by redesigning manual processes for greater efficiency and supporting them with new technologies and improved processes. Work within the framework of the MEDITECH PCS module to provide organizations with a reliable approach that focuses on clinical content, system functionality, and processes to ensure their technology investment is delivering the highest possible results.

## Required Skills & Qualifications

Experienced hospital Clinical Informaticist or Clinical Analyst strongly required. Knowledge of the dictionaries, building, and best practice implementation for the PCS module, and its integration with other modules and the EMR to meet quality requirements and meaningful use. Ability to manage project plan tasks, issues logs risks, and create status reports. Uses industry standard change control practices. Ability to supervise and train other IT staff involved in the PCS dictionaries and build.

## Required Certifications

- Minimal 2 years experience with information system software solutions
- Bachelor's degree in clinical area, healthcare business management or information system
