Jacobus Consulting

EPIC CONSULTING SERVICES

Jacobus CONSULTING™

Healthcare Technology

Taking Epic to the NEXT LEVEL?

Meaningful Use, Care Coordination, Population Management, Value-based reimbursement, narrow networks, and community engagement initiatives are just a few of the recent demands driven by healthcare reform and changing market dynamics. For Epic users, these issues continue to drive new requirements for software implementation and optimization to support strategic financial, clinical and quality goals.

Jacobus Consulting helps providers achieve success through our Epic consulting expertise. We bring over fifteen years of successful healthcare IT consulting and a nationwide client base. Our Epic practice can assist with strategy, planning, implementation and support during all stages of implementing or optimizing Epic EHR and new modules, and help extend the benefits of Epic through the Connect model.

Our Epic consultants are certified in applications spanning the full spectrum of modules and bring hands-on healthcare operational experience in clinical and financial roles to ensure that your Epic optimization will meet the needs of your users.

THE JACOBUS APPROACH TO EPIC

Following Epic's validation based implementation methodology, we guide our clients in the critical change management efforts needed for staff satisfaction and adoption, while managing tight deadlines. Our Epic experts efficiently design and build any needed changes to the Foundation System to support efficient, safe and reliable clinical and financial workflows.

Our methodologies align with Epic best practice to ensure consistency between client, vendor and consulting partner. Our Epic consultants are trained and knowledgeable on all phases of the implementation methodology and lead through key project milestones – from planning and kick-off, to Foundation System validation sessions to successful Go-Live.

Jacobus Consulting is wholeheartedly committed to helping providers improve patient care and quality, optimize operations, and increase financial performance through process redesign, healthcare technology and workforce development. Because of the depth and breadth of our expertise, we are uniquely suited to be your partner to solve the most complex challenges in healthcare.

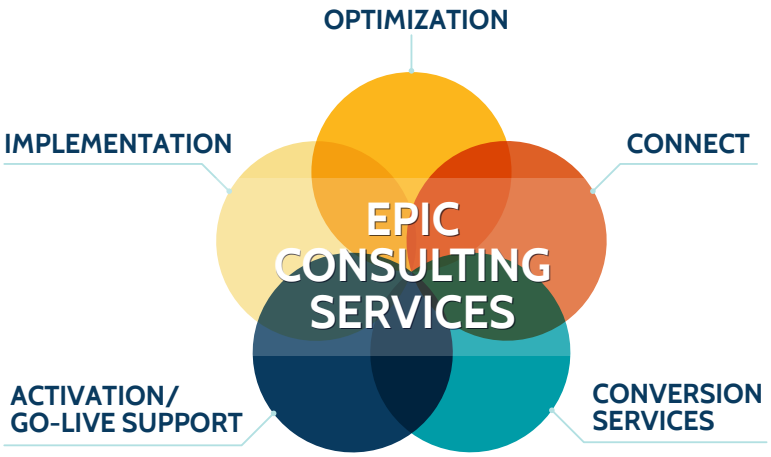
OUR EPIC CONSULTING SERVICES INCLUDE:



Implementation

Epic customers often require assistance to extend the Foundation build to address regulatory mandates, budget restrictions, user adoption and productivity goals, and resource constraints – while planning further optimization. Our experts can enable your implementation with:

- Installs & Additional Applications: Consulting from planning through go-live
- Foundation System design, build, and validation sessions to support efficient, safe and reliable clinical and financial workflows

Connect

Extending Epic capabilities to affiliated physician practices and Community Hospitals brings benefits for the host, affiliate, community and patient. We can ensure your implementation & roll-out is seamless by:

- Perform analysis of your market and costs to develop a tailored offering
- Determine marketing strategies and promote your Connect offering to community practices and hospitals
- Assist in contract creation and schedule development
- Develop and implement change management and adoption strategies at Affiliate site
- Full implementation, training and support to Host and Affiliate

Optimization

ClinDoc: Planning for optimization is a key part of Epic's implementation process, and ClinDoc optimization should be a high priority – especially with changing Quality, Meaningful Use and ICD-10 data requirements. We can assist with:

- Design of workflows to ensure all information is captured
- Support for clinicians and physicians to ensure they efficiently navigate and document within the Epic system

Revenue Cycle: Flexibility is needed to support evolving reimbursement and shared payment models. We assist with:

- Capture of costing data to support shared reimbursement allocations
- Optimization of Revenue Cycle workflows and data capture to ensure maximum revenue reimbursement
- Drive efficiency across Patient Access, Case Management, Revenue Integrity, HIM and the Business Office to optimize operations and reduce costs

Conversion Services

When considering an Epic conversion/migration, costs can be avoided by sun-setting the old system, yet access to old information is still needed. Planning ahead is key for continued access to prior system data. Our services provide:

- Decommissioning assessment and planning for prior system data
- Data Extraction, Transform and Load of data (E/T/L) from originating system data
- Provide open database availability alternatives, with web access
- Plan for issues such as data governance, security and access control
- Support testing to ensure all needed data migrates

Activation & Go-Live Support

Epic Go-Live activation is a fast paced phase of the Flight Plan methodology – placing significant demands on typically stressed out Epic project teams. We can give your team a boost with:

- Staffing for final stage Epic testing
- Go-Live and cutover planning
- Command center support resources
- "At-the-elbow" Epic user support and training

ACHIEVE WHAT MATTERS MOST.
