CLINICAL INFORMATICS RN - PCM

Position Opportunity

Jacobus is currently seeking qualified associates to fill positions for LENGTH OF CONTRACT with West Coast/East Coast/Mid West/Etc. hospital. This position is available to sub-contractors, full-time employees, OR both sub-contractors and full-time employees.

About Jacobus

Jacobus Consulting is a leading healthcare IT services firm that partners with providers to improve healthcare outcomes and streamline operations through improved clinical systems, revenue cycle performance optimization, and healthcare information systems. In the face of changing healthcare industry technology, regulatory demands, and financial landscape, we provide a complete suite of solutions.

About This Position

This position works with the client and is responsible for PCM, CPOE and PDOC planning and implementation utilizing best practice. Ability to perform or lead team in clinical and business workflow analysis, documentation and optimization related to CPOE and PDOC. Responsible for assessing needs and learning opportunities for CPOE and PDOC planning, implementation, monitoring and deployment. Ability to conduct systems planning application and validation. Works with clients to identify and define physician order sets and documentation templates to be developed. Work with clients (providers) to design, build and implement individual order sets and documentation templates if required.

Ability to train clients on software. Assist in defining future state workflows and system design. Responsible for investigating, tracking and assisting to resolve client issues. Communication liaison to senior administration. Represents the clinical perspectives for CPOE and expert resource for staff and providers. Leads interdisciplinary teams. Networks with physician community to facilitate success. Provides status reports and measurement of success to appropriate parties. Identify opportunities for core measurement tools and meaningful use criteria implementation.

Required Skills & Qualifications

Experienced hospital Clinical Informaticist or Clinical Analyst strongly required. Knowledge of the dictionaries, building and best practice implementation for the order management and documentation modules: OM, CPOE, PDOC and PCM. Ability to manage project plan tasks, issues logs, risks, and create status reports. Uses industry standard change control practices. Ability to supervise and train other IT staff and core team members involved in the dictionaries and build. Ability and commitment to meet aggressive deadlines. Capable of working well in a diverse, multi-disciplinary team. Excellent interpersonal, written and oral communication skills, and effective presentation skills. Ability to maintain a professional attitude. Problem solving skills. Ability to plan and facilitate meetings with diverse groups. Project management and/or team lead skills. Strong motivation and team skills. Highly organized with attention to detail, execution and follow-through. Experience working with physicians.

Required Certifications

- Minimal 2 years experience with information system software solutions
- Bachelor's degree in clinical area, healthcare business management or information system
