MAESTRO SYSTEM CONSULTANT

Position Opportunity

Jacobus is currently seeking qualified associates to fill positions for throughout the United States and Canada. This position is available to either sub-contractors (1099s) or full-time employees.

About Jacobus

Jacobus Consulting is a leading healthcare IT services firm that partners with providers to improve healthcare outcomes and streamline operations through improved clinical systems, revenue cycle performance optimization, and healthcare information systems. In the face of changing healthcare industry technology, regulatory demands, and financial landscape, we provide a complete suite of solutions to assist providers to improve quality measures and patient care, optimize operational efficiency, and lower costs.

About This Position

Work with the home health and hospice care provider to implement MEDITECH'S MAESTRO home health system in order to enable the organization to have a seamless continuum of patient care process flow throughout the HCIS system fully integrating to MEDITECH. Examine, analyze, and document the existing processes for opportunities to change, add, or eliminate any steps that are no longer adding value. Develop process redesign as a strategic initiative to improve the quality, cost, and safety of patient care by redesigning manual processes for greater efficiency and supporting them with new technologies and improved processes. Work within the framework of the MEDITECH MAESTRO home health system to provide organizations with a reliable approach that focuses on clinical content, system functionality, and processes to ensure their technology investment is delivering the highest possible results.

Assists the client by providing data (clinical and business related) in order to make sound operational decisions and provide expertise to system design, build, testing, and optimal implementation. Analyzes needs and develops hardware, software solutions and interfacing requirements for all home health services. Knowledgeable regarding the impact of home health and hospice systems on the integrated medical record, clinical documentation system, and inpatient and ambulatory prescriber order entry systems. May perform project management responsibilities including charter and scope development, project plan development, task development, risk management, testing, and training development.

Required Skills & Qualifications

Knowledge of the dictionaries, workflow processes, build tasks, and best practice implementation for the MAESTRO home health and hospice functionalities. Ability to manage project plan tasks, issues logs risks, and create status reports. Uses industry standard change control practices. Ability to supervise and train other IT staff involved in the dictionaries and build. Experienced Clinical Informaticists or Clinical Analysts preferred.

Required Certifications

RN or LPN/LVN preferred, BSN preferred
