# MEDITECH Report Writer/ Programmer Analyst

## Position Opportunity

Jacobus is currently seeking a qualified Sr. Programmer to work with Hospitals across the country on the development of customized reporting solutions. This position is available to sub-contractors with opportunities for full time employment.

## About Jacobus

Jacobus Consulting is a leading healthcare IT services firm that partners with providers to improve healthcare outcomes and streamline operations through improved clinical systems, revenue cycle performance optimization, and healthcare information systems. In the face of changing healthcare industry technology, regulatory demands, and financial landscape, we provide a complete suite of solutions.

## About This Position

Works with multiple clients to develop both ad hoc reports and system-wide reporting/data management programs and strategies. This position will require flexibility and willingness to work on a wide range of projects from both on-site and remote locations. The focus of this position will be on (but is not limited to) the development of reports to support clinical practice and management, development and delivery of report training packages to clients, and the development of comprehensive reporting programs including dashboard development, data analytics/architecture and data management strategies for client sites with the intention to assist the client by providing data (clinical and business related) in order to make sound operational and strategic decisions. Responsible for evaluating information system infrastructure, may also analyze needs and develop reporting and software requirements for data management services.

Duties and responsibilities will include, but are not limited to the development of reports through the use of MEDITECH Magic & C/S NPR, 6.0 Report Designer, and Data Repository (DR) or SQL based programming techniques, recommendations for the development and management of reporting from the MEDITECH HCIS and Data Repository, interaction with MEDITECH on identified issues, questions and concerns, develop and deliver training packages for analysts, develop analyst reporting skills including responding to technical questions and custom report development requests, work on team projects including the development of programs and specific consulting solutions (both for clients and for Jacobus), research new technologies, attend seminars, workshops, training sessions and professional meetings to keep abreast of developments in the field.

## Required Skills & Qualifications

- Bachelor's degree (computer science, statistics, measurement and evaluation). Master's degree preferred.
- 1-3 or more years experience in data analysis and reporting utilizing MEDITECH Magic & C/S NPR, 6.0 Report Designer, or Data Repository (DR/SQL)
- Ability to communicate clearly and effectively. Demonstrated oral and written communication skills required

- Ability to express technical issues clearly
- Possesses good organizational and presentation skills
- Working knowledge of data standards/normalization
- A comfort, or even preference, for an environment of discovery and uncertainty.
- Some travel will be required
- Typical work week hours can vary depending on workload and project deliverables.
- Excellent interpersonal skills
- Goal and quality driven
- Willingness to provide excellent customer service

The right person for this position will demonstrate both an ability and willingness to ensure superior client deliverables while demonstrating the creative thinking and independent drive to build something new and important in a complex consulting environment. Candidates should be independent, but also interested in working in a team environment.
