

PREDICTIVE ANALYTICS DRIVES POPULATION HEALTH MANAGEMENT

It's not all hype: The sickest 20% of patients account for 80% of costs. CMS has commissioned bold goals to drastically change provider payments in 2018.

The power of your data: Your organization's ability to meet CMS goals requires a **holistic and coordinated approach to developing a strategy** starting with executive leadership, technology, and predictive analytics.

Build a strategic roadmap to predict and identify patients who are most at-risk, who will make unfortunate health transitions, and **empower clinicians to attempt to alter that path with targeted interventions.**

The Jacobus Predictive Analytics Roadmap can help your organization:

- Support population health management goals
- Prevent or delay onset of disease and its effects
- Predict trends
- Better understand patients
- Improve business performance
- Drive strategic decision-making
- Predict outcomes
- Demonstrate ROI

How are you progressing on the journey to population health management?

We want to hear from you.
